Description:

Axtel Hello is a webcam that provides security, convenience and quality. With the **Windows Hello Face Recognition** technology, you can log in to your computer with your face, without typing a password. The camera is perfect for remote work, video conferencing, vlogging, streaming and online teaching. It has a built-in digital microphone that picks up voice within 5 meters. The camera also has advanced features **AEC & ANS & AGC**, which reduce echo, noise and automatically adjust the volume level. The camera also has a built-in privacy cover that covers the lens when not in use. The camera has a type C interface that allows plug and play without installing drivers. The camera records smooth and clear video in Full HD resolution (1920 x 1080 pixels). The camera automatically adjusts the brightness and color in low light conditions. **Axtel Hello** is a camera that will meet all your communication needs.
